Sleep Mastery: A Comprehensive Approach to Better Sleep

A 10-lesson course covering sleep neuroscience, assessment tools, relaxation techniques, environment design, nutrition, and building your personalized sleep blueprint

Why Sleep Matters for Mental Health

Sleep isn't just rest — it's your brain's **essential maintenance period**. During sleep, your brain consolidates memories, processes emotions, clears metabolic waste, and restores neurotransmitter balance.

2x

Depression Risk

Poor sleep doubles your risk of depression

3x

Anxiety Risk

Poor sleep triples your risk of anxiety

#1

Highest Leverage

Sleep optimization is one of the highest-leverage interventions for mental health

What You'll Learn

This course covers the full spectrum of sleep science — from neurobiology to practical daily habits — giving you everything you need to transform your sleep.

1

Sleep Neuroscience

Circadian rhythms, sleep architecture, and adenosine dynamics

2

Assessment & Tracking

Evidence-based sleep assessment tools and sleep diary tracking

3

Relaxation Techniques

Progressive muscle relaxation and body scan methods

4

Environment Design

Optimizing light, temperature, sound, and bedding

5

Nutrition & Stimulants

Magnesium, tryptophan, caffeine, alcohol, and meal timing

6

Digital Wellness

Blue light management and digital detox strategies

Beyond Just "Going to Bed Earlier"

Sleep optimization goes far beyond basic sleep hygiene tips. This course dives deep into the science behind what truly drives sleep quality.

Circadian Light Response

Why your circadian rhythm responds powerfully to morning light exposure — and how to use it to anchor your sleep-wake cycle

Core Body Temperature

How your core body temperature drop triggers sleep onset — and the environment hacks that accelerate it

Alcohol & REM Sleep

Why alcohol fragments your REM sleep and leaves you feeling unrested even after a full night in bed

Nutrient Neuroscience

How specific nutrients support neurotransmitter production — the biochemical foundation of deep, restorative sleep

Your Personalized Sleep Blueprint

Every person's sleep needs are different. This course helps you build a **personalized sleep blueprint** based on your chronotype, lifestyle, and specific sleep challenges.

1

Track

Monitor your sleep patterns with structured diary tools and assessment frameworks

2

Test

Experiment with targeted interventions matched to your unique sleep profile

3

Build

Create a sustainable, personalized routine that fits your life and lasts

Course Structure

10 Lessons

Comprehensive, self-paced modules

10–12 Hours

Deep, evidence-based content

Self-paced. Evidence-based. Designed for lasting transformation.

All 10 Modules

01

Sleep Neuroscience

02

Sleep Assessment

03

Relaxation Techniques

04

Environment Design

05

Nutrition for Sleep

06

Stimulant Management

07

Digital Wellness

08

Stress and Sleep

09

Special Populations

10

Your Sleep Blueprint
